# **English Book and Commercial Letters**

## **Book 3**

### **Introduction**

#### **Aim:**

The general aim of this course is to develop learners' language skills; listening, speaking, reading and writing. It supplements what they have learnt in the previous years with more specification in conformity with the other subject matters in the curriculum, and to be able to use the English language communicatively in the future.

#### **Objectives:**

By the end of the three-book series, learners are supposed to:

1. develop knowledge of the basic elements of English language: vocabulary, pronunciation and grammar,
2. develop understanding of oral and written language skills,
3. be aware of the specific vocabulary and expressions relevant to their study; i.e. poultry, fish breeding, fertilizers, dairy products, marketing, etc,
4. develop aesthetic and cultural creative sense in order to appreciate English for specific purposes (ESP) topics and literature,
5. participate in everyday-life communicative dialogues, discussions and Interactions,
6. understand instructions and read manuals, booklets and magazines in the field of commerce,
7. develop receptive skills, i.e. listening and reading, by practicing certain

Activities in this respect,

8. Promote productive skills, i.e. speaking and writing, by fulfilling meaningful and authentic activities,
9. be capable of using specific language in their future career,
10. practice language learning skills such as speed reading skills, i.e. scanning, guessing, etc,
11. practice language learning autonomy strategies such as note-taking, summarizing etc,
12. become active participants and language users, and
13. involve in co-operative learning.

## **Syllabus Design**

Each book of the series has the following activities format: vocabulary, speaking, reading, pronunciation, grammar and writing. This is to ensure its communicative purposes within the activity sequence and to motivate learners to participate effectively. Listening is achieved indirectly by exposing learners to the model, i.e. the teacher.

## **Language Activities**

### **a- Vocabulary**

New words are introduced at the beginning of the units in the form of activities so as to be familiar to students when they appear again in the reading text. Teachers are supposed to encourage students to work out the activities as a warm up.

### **b- Speaking**

There are speaking activities in every unit. They include dialogues which will equip students with the basic expressions needed to cope with everyday conversations in

English concerning their field of study and future career. These activities will give them both practice and confidence in using what they learn.

### **c- Reading Comprehension**

Each unit has one main reading text preceded by lead inquestions and activities to give students reason to read and to predict what they will be reading about in the text. At the same time, it is a kind of brainstorming to what they already know about the world (prior knowledge) or about English. The reading texts are supplemented with various activities to help students discover and learn new vocabulary and expressions.

### **d- Pronunciation**

This activity provides practice in English pronunciation with sufficient illustrations. The presentation of the English sound system needs to be enriched by other examples and/or activities on the part of the teacher and the learners respectively.

### **e- Grammar**

The main grammatical points are almost given according to their occurrence in the reading passages. They contain activities which promote practising the main structure item. They are also reviewed in the **Revision** units for reinforcement and ease in using them again.

### **f-Writing**

Writing is promoted by exposing learners to activities that include practising certain writing skills and sub-skills. Sometimes if activities are new, instructions are presented to the learners where they are required to follow these step by step.

## **Revision Units**

Revision is crucial in language learning. There are two revision units. Each one is situated after every three units. Language and structures are recycled throughout various activities in order to help students reinforce what they have learned, especially new items and vocabulary.

## **Working in Pairs or Small Groups:**

The learner is the core of the learning process. It means he/she must have an active role whether individually or in pair/group work.

The activities are either oral or written. The oral ones are done in pairs, groups, or whole class participation, and even assigned by the teacher to be practised at home. As for the written activities, they are done by learners at school or home for reinforcement and practice. In pair or group activities, teacher should make sure that students do understand the aims of the activity.

Pair or group work is not easy to organize in every class, and there may be a noise problem to deal with. However, it is worth trying occasionally. Working in pairs or groups encourages students to share ideas, practise and help each other, to broaden their communicative skills.

Teachers monitor the class in order to:

- aid the flow of conversation when necessary,
- identify any common errors or areas of breakdown,
- offer encouragement, and
- recognize when best to change the pairs or the groups.

## Assessment Procedures

### **1.8**

#### **Types of Product Policy Decisions**

The marketer has to keep in mind the product policy decision while introducing a product. It is a competitive tool in the hands of the marketer. It involves three basic decisions:

##### **1. Individual product decision**

a-Product attribute: it refers to the quality, feature, style and design of the product.

With the help of the quality, the manufacturer can give the customers assured quality product. Feature helps in differentiating the product from other products. Style and design help to bring the attention of the customers towards the product.

b-Product branding: it is very essential to give a product a brand name. Only with the help of brand name the customer can differentiate a product from other products. Branding facilitates the marketers in promoting the product and making consumers brand conscious.

c- Product packaging: packaging means the wrapper which contains the product. Packaging acts as a silent salesman. It is with the help of the packaging the customer comes to know about the product quality, quantity, weight, price etc.

d-Product labeling: labeling gives the consumer information about the manufacturer's name, place, date of manufacturing, expiry date, calories, carbohydrates, nutritional value etc.

e-Product support services it means the services which are provided to the customer after selling the product to him/her like after sale services, installation and maintenance.

## **2. Product line decision**

It means a group of products which are closely related to each other. In product line decision the marketer has to make decision regarding the product line length, which means the number of products in the product line. There are two ways of adding the product.

a-Product line stretching: it means when a company adds a new product by stretching the product line by upward, downward or both ways.

b-Product line filling: it means adding a new product within existing range of products.

## **3. Product mix decision**

It means the complete set of product line produced and sold by the company.

For example; Nestle produces milk powder, sugar, tea, etc. Product mix consists:

a-Product mix width: refers to how many products company is offering such as:  
soap, shampoo, powder etc.

b-Product mix length: refers to the number of items in each product line. For example; five kinds of soap, seven kinds of powder, etc.

c-Product depth: refers to different items in each product line such as offering different kinds of soap;Lux, Santoor, Hamam.

## **Reading**

### **2.4 Cost Accounting**

Cost accounting is that branch of the accounting information system which records measures and reports information about costs. The primary purpose of cost accounting is cost ascertainment and its use in decision-making and performance evaluation. It is also useful in planning and controlling.

Job cost accounting is the process of assigning the costs you incur to a specific job you or your business is involved with.

Cost accounting includes classifying, recording and appropriate allocation of expenditure for the determination of costs of products. This is done through the presentation of data to take decisions and guide the business organization.

The next one important aspect is the differences between the cost accounting and management accounting.

Points of Difference		Cost Accounting	Management Accounting
1	<b>Objectives</b>	It ascertains the cost.	It takes decisions based on cost information.
2	<b>Scope</b>	It deals with the cost.	It deals with the cost and revenue.
3	<b>Data</b>	It uses only quantitative data.	It uses both qualitative and quantitative data.
4	<b>Utility</b>	It ends at the presentation of data.	It starts from where the cost accounting ends.
5	<b>Policy</b>	It deals with the past and present data.	It deals with future policies and actions.

**The process of cost accounting passes through the following steps:**

1. Defining the decision: understanding the options under consideration helps to identify the type of cost information that will be needed.
2. Identifying and understanding costs. It is necessary to identify direct costs (labour material and capital), indirect costs (such as damage).

3. Analyzing financial performance to recognize the time value of money; a dollar today is worth more than a dollar tomorrow.
4. Making the decision - through integrating all the factors that are relevant to profitability of an investment opportunity.

## **Activities**

### **2.5 Answer the following questions.**

1. What is 'cost accounting'?
2. What are the processes of cost accounting?
3. What does management accounting deal with?

### **2.6 Complete the following statements with information from the text.**

1. Cost accounting is useful in ..... and .....
2. Cost accounting includes ....., ..... and ..... of expenditure.
3. Cost accounting uses only ..... data.
4. Management accounting uses both ..... and ..... data.
5. Understanding the options helps to identify .....

### **2.7 State whether each of the following sentences is true or false.**

1. Cost accounting deals with the cost and revenue.
2. Management accounting takes decisions based on cost information.
3. The primary purpose of cost accounting is cost ascertainment and its use in decision making.
4. Management accounting uses only quantitative data.
5. Cost accounting deals with future policies and actions.

## Pronunciation

## Grammar

### 2.10 Adjectives and Adverbs

A. Adjectives are words that describe nouns or pronouns. They may come before or after the word they describe .

#### Comparative and Superlative Forms

Adjectives have forms called *comparative* and *superlative* that are used for comparisons.

- Use the comparative form when comparing two items, people, places, or ideas.
- Use the superlative when comparing more than two.
- For short adjectives (with one syllable or two syllables ending in -y or -le), add **(-er)** for the comparative and **(-est)** for the superlative.
- Change **(-y)** to **(-i)** if the **(-y)** is preceded by a consonant:

Example: **icy, icier** than, the **iciest**

- Generally, **the** is used before the superlative form.

<u>Word</u>	<u>Comparative</u>	<u>Superlative</u>
short	shorter	shortest
pretty	prettier	prettiest

simple	simpler	simplest
Fast	faster	fastest
Fat	fatter	fattest
thin	thinner	thinnest
big	bigger	biggest

With longer adjectives, add *more* and *most*.

<u>Word</u>	<u>Comparative</u>	<u>Superlative</u>
intelligent	more intelligent	most intelligent
carefully	more carefully	most carefully

### Irregular Forms

The following are irregular comparative and superlative forms.

<b>Word</b>	<b>Comparative</b>	<b>Superlative</b>
good /well	better	best
bad	worse	worst
much/many	more	most
little	less	least
far	farther	farthest

### Order of Adjectives

**The general order of adjectives before a noun is the following**

Determiner	Opinion	size	age	shape	color	origin	material	purpose	noun
A	ugly	small	old	thin	red	Italian	cotton	sleeping	bag
An						French	silk	wedding	dress
This						Greek	clay	cooking	vase
Some	beautiful	large	ancient	long	white				

## Examples

1. I love that **big old green antique** car that always parked at the end of the street.  
(size - age - colour - proper adjective)

## Reading

### 3.4

### The Purchase Order

Purchase Order is a written sales contract between the buyer and the seller detailing the exact merchandise or services to be rendered from a single vendor. It will specify payment terms, delivery dates, item identification, quantities, shipping terms and all other obligations and conditions.

All businesses broadly involve two parties, the buyer and the seller. A buyer is the one who is looking for goods, products or services which are available in exchange for money. While the seller is the one who is offering these goods, products or services.

In order to understand what is the basic difference between a purchase order and an invoice let's take an example. Suppose Diva Textiles is the seller who sells all sorts of clothes in bulk. Tom is a buyer and wants to buy clothes in a large volume. Now Tom will have to make a purchase order and in return, Diva textiles will give him an invoice of the amount in order to get paid.

There are two basic differences between a purchase order and an invoice:

1. The purchase order is what the buyer prepares, while the invoice is what the seller makes in lieu of the payment receivable.
2. The purchase order lists the quantity and the due date of delivery of goods, products or services purchased/ordered by the buyer, while an invoice has on it the price of the goods, products or services being sold.

So in this case, the purchase order is what Tom will send while the invoice is what Diva Textiles will provide Tom in accordance with his purchase. So without the purchase order, no invoices can be generated as it explains and mentions the details of the goods, products or service. These are in terms of quantity, price, due date and most importantly payment terms.

While on the other hand Tom also needs to know how much the purchase costs him. Because it is a bulk purchase, the Invoice would help him cross check whether he has received what he has ordered.

In a gist, the purchase order is the communication from the buyer that is, Tom in this case, to the seller that is Diva Textiles. While the invoice is the response from Diva Textiles (seller) to Tom (buyer).

Now, follow this example of writing an order .

## The Business Invoice

[illegible]

The business invoice is an essential legal document prepared by a vendor or service provider as a record of goods or services sold to the customer or client. The vendor or service provider needs to retain a copy as a record of their sales. The customer or client needs to retain a copy as a record of their purchase or expense.

The invoice is normally sent together with the delivery of the goods or on completion of services you rendered, or separately in the mail after the delivery of goods or services.

## How To Write An Invoice

Basically you can divide the Invoice into 3 main parts : The Header, The Body and The Footer.

## 1. The Invoice Header (The Top Part)

- **Your letterhead:** Your business name, address, telephone & email and web address if available. In some countries, you must also include your business registration number.
- The words “**Invoice**” or “**Bill**” are clearly written towards the top of the page. If you are registered to bill and collect tax, in some countries you may instead have to use the words “Tax Invoice”. You must confirm with your local tax authority if you need to use the words “Tax Invoice”
- If you register to bill and collect tax, you may also need to include your **Tax Registration number**. This can usually be indicated just below the words “Tax Invoice.”
- **An invoice number.** This is a serial number that you maintain. You should only have one number per invoice issued. Hence, no two invoices should have the same number.
- **An invoice date.**
- **Your payment terms** or how soon you expect to be paid; for example: "Cash", "30 days" etc.
- Your customer or **client name and address**.

## 2. The Invoice Body (The Middle Part)

- A **description of the goods** you are supplying: quantity, unit of measure, price per unit and total amount for individual items.

## 3. The Invoice Footer (The Bottom)

The invoice is signed by the seller and his sales manager. There is also an important document that can be shown here. It is a 'certificate of origin' which shows the place where the goods are manufactured and produced. The aim is to prevent merchants from importing goods produced in black listed countries.

There are different types of invoices in term of delivery. The following diagram explains that:

Type	Place of Delivery	Features
Loco	at the seller's factory	price, all expenses and insurance
F.A.S.	on the docks of the seller's port	price, loading expenses, freight charges, and insurance (for foreigners)
F.O.B.	on board of the ship of the seller's port	price and freight charges
C & F	at the buyer's port	price and insurance (for foreigners)
C.I.F.	at the buyer's port	insurance is paid by the seller.
Franco	at the buyer's place	insurance is paid by the seller

**Now, follow this example of writing an invoice.**

### Online Shopping

Online or electronic shopping (E-shopping) means shopping via the Internet. It allows the user to order directly over the Web. There is the online shopping-cart system that allows the user to generate an order form to be sent to the merchant.

Today, many people are taking advantage of this convenient way of shopping. However, together with this luxury of convenience, new concerns on information security have emerged, with online frauds or cyber crimes being one of the biggest threats.

To make e-shopping safer, here are some tips: First, choose e-shopping sites that are well-known or provide trusted services. Contact someone there who can verify the company's privacy policy for you before you make a purchase. Ask if they will send you a catalogue. If they do not list phone numbers and only have an e-mail address, you have to be careful.

Click on the shopping cart icon. The shopping cart is a software that acts as an online store's catalogue and ordering process. It allows consumers to select merchandise, review

what they have selected, make necessary modifications or additions, and purchase the merchandise.

Before typing in your credit card information, look for the "plural URL." That is, when you go to the site's checkout page, the "http" in the URL should change to "https." A closed padlock or key should also appear on the page, letting you know that your personal information will be encrypted or scrambled. If you don't see either of these "locked" icons or a change in the URL, log out and shop elsewhere.

You have found a trustworthy site with a secure checkout page. Now you are ready to pay. With what do you pay? Cheque, cash money, debit card or credit card ? Experts say credit cards are the safest method for online purchases as most credit cards have protection on them. Secondly, by using a credit card, it is not just your money on the line but also the creditor's. If you have a problem with your transaction, the credit card company will help you resolve it. If you are at the checkout page and the site asks for your date of birth and identity card number, be very careful as people can manipulate this combination to start applying for new credit cards in your name. Also, be wary of sending out credit card information via e-mail or instant messaging as neither is encrypted.

Click on the "Buy" icon and your order will be delivered to you.

According to the latest survey, books are one of the things bought most online. This is followed by accessories. Cosmetics and groceries are increasingly being purchased online. Today, most of the travelers are buying tickets online because it is a quick and easy way to make a purchase.

Is online shopping safer than shopping offline? It is difficult to say. When shopping online, caution is the word.

## 7.2 Insurance and Reinsurance

### ***Remember***

In **Book 2**, we spoke about the **insurance** as a special type of contract between an insurance company and its client in which the insurance company agrees that on the happening of certain events the insurance company will either make payment to its client or meet certain costs.

Insurance and reinsurance are both forms of financial protection which are used to guard against the risk of losses. They both allow for the transfer of potential loss from one entity to another in exchange for a financial payment in the form of a premium. They each function to pool risk; however, risk is transferred in different ways.

Reinsurance is a contract or a process made between an insurance company and a third party to protect the insurance company from losses and major claims. Reinsurance is insurance for insurers. This happens especially for Non-Life insurance when the claim can be of humongous amount or in case of any natural calamity when large number of claims happens together.

**Now study the following sentences in order to show the difference between *insurance* and *reinsurance*.**

1. **Insurance** is the act of being insured.
2. Life **insurance** is a contract between an insured and an insurer.
3. There are two kinds of **reinsurance** contracts: treaty and facultative .
4. By using **reinsurance**, the insurer can accept the whole risk and then reinsure the parts it cannot keep with other insurers.
5. Many types of **reinsurance** include an aspect of liability coverage.
6. **Reinsurance** is when an insurance company will guard themselves against the risk of loss.

## 7.3 Word Partnerships

**Agent:** Sure, I can help you with that. I **assume** you want liability insurance, but what other **coverage** would you like to get?

**Kamal:** Umm...I'm not sure. This is my first car.

**Agent:** In that case, let me make a few suggestions. You'll definitely want collision insurance. It pays to fix your car if you hit another car or **run into** something.

**Kamal:** Okay, sure, I want that.

**Agent:** You'll also want comprehensive insurance. It pays for **damage** to your car.

**Kamal:** How's it different from collision insurance?

**Agent:** Well, it pays for damage to your car that's not a result of an accident, like in the case of theft, weather damage, or **vandalism**.

**Kamal:** Okay, I want that, too.

**Agent:** You'll want property damage insurance to pay for damage you cause to someone else's property. On top of that, you'll want uninsured motorist insurance in case the other driver doesn't have insurance or doesn't have enough insurance to pay for the damage to your car.

**Kamal:** Umm...I guess I'll take that, too.

**Agent:** And I don't think you can do without medical payments insurance. It pays for your medical bills and those of your passengers in case of an accident. Should I get you a quote for all of this coverage?

**Kamal:** Why don't you **hold off on** that? I'm not sure how I'm going to pay for all that and buy gas, too!
